

Top and Absolute Priority

It is the lofty idea of the respected Comrade **Kim Jong Un** that top and absolute priority should be given to the interests and convenience of the people in every work.

That is why he always instructs that the desires and interests of the people should be regarded as the first criterion building architectural structures and producing consumer goods.

One day in October Juche102(2013) he looked around the Munsu Water Park, whose construction had been finished.

Looking at the people coasting down the water slides at the outdoor wading area, he told to the officials that he saw some people failing to reach the end of the steep slide.

A few moments later, he said that a ladder should be installed in the middle of the horizontal part of the slide so that those who failed to slide down to the end could step out sideways.

Even though he took measures to build such a wonderful water park for the people, he thought that he could do something more for the people, and busy as he was, he visited it, taking measures lest the people feel inconvenience.

Later a ladder was installed by the steep slide.

Compared to the wonderful view of the Munsu Water Park, that ladder is too small and is hardly visible to the eye.

This tale shows the warm affection cherished by **Kim Jong Un**, who gives top and absolute priority to the interests and convenience of the people.
