

Tol River in Mt Ongnyon

The river is in Mt Ongnyon, Pujon County, South Hamgyong Province.

The sound of water that flows beneath a stone field, 120m wide and 700m long, is heard, but the river itself is not seen. It is designated as a natural monument for its academic and scenic significance.

The size of the stones is 1-4m in diameter.

The water that was flowing under the stones is seen on the ground from where the river flow ends.
